

notecard.notecard.Notecard

```
classDiagram
    class Notecard["notecard.notecard.Notecard"]
    class OpenI2C["notecard.notecard.OpenI2C"]
    class OpenSerial["notecard.notecard.OpenSerial"]
    OpenI2C --|> Notecard
    OpenSerial --|> Notecard
```

The diagram illustrates a class hierarchy. At the top is the 'notecard.notecard.Notecard' class, represented by a gray-shaded box. Below it are two subclasses: 'notecard.notecard.OpenI2C' on the left and 'notecard.notecard.OpenSerial' on the right, both in white boxes. Blue arrows point from each subclass box up to the 'Notecard' box, indicating that both 'OpenI2C' and 'OpenSerial' inherit from 'Notecard'.
